PROGRAMMING

Core languages

C# · Python · Java · SQL

Web languages

JavaScript · PHP · HTML · CSS

FRAMEWORKS & PLATFORMS

Application development

ASP.NET MVC / Core, Windows Forms, Flask, Streamlit, Bootstrap

AI & data workflows

Groq API integration, Pandas, Matplotlib

DATABASES & TOOLS

Databases

SQL Server, MySQL, SQLite, Entity Framework

Developer toolkit

Git & GitHub, Visual Studio, VS Code, NetBeans, SSMS, Postman

Adobe Photoshop · Canva · Microsoft Office

ENGINEERING FOCUS

Methods

Object-oriented programming, data structures and algorithms, UML, layered architecture

Practices

Authentication, relational modelling, API integration, testing and documentation

PROJECT DOMAINS

AI-assisted learning · Web platforms · Desktop systems · Data visualisation

PROFESSIONAL PROFILE

Software Engineering undergraduate creating web, desktop and AI-assisted applications using C#, Python, Java and relational databases. Experienced in role-based authentication, API integration and layered software design, with industry exposure to quality-focused autonomous-vehicle AI datasets.

PROFESSIONAL EXPERIENCE

ASSOCIATE IMAGE PROCESSOR

NOV 2025 - JUN 2026

OREL IT (Pvt) Ltd · Maharagama

Annotated image and video datasets for autonomous-driving AI, including pedestrians, vehicles, traffic signs and road lanes. Followed quality standards and productivity targets and collaborated with QA teams to maintain consistent labels.

SOCIAL MEDIA DESIGNER AUG - NOV 2023

Tranzform International · Digital marketing

Designed client-facing social content with Adobe Photoshop and Canva, and supported Instagram and Facebook campaigns.

FEATURED SOFTWARE WORK

HealthTrack Pro | GITHUB

FITNESS MANAGEMENT · WEB

Role-based fitness platform for client, trainer and administrator workflows, including workout and nutrition tracking, dashboards and AI-assisted features.

STACK C# / ASP.NET MVC / SQL Server / EF

SmartMed Pharmacy ERP | GITHUB

PHARMACY MANAGEMENT · DESKTOP

Layered desktop application with role-aware access, inventory, supplier and ordering interfaces, and invoice-related workflows.

STACK C# WinForms / SQL Server / Layered architecture

RESEARCH AND DEVELOPMENT FOCUS

Built and deployed EduMind AI to evaluate personalised feedback in undergraduate learning.

PROJECTS & QUALIFICATIONS

SOFTWARE ENGINEERING

MALEESHA DEWMINA PERERA

EDUCATION

BEng (Hons) Software Engineering (Top-Up)

London Metropolitan University via ESOFT Metro Campus, Negombo

EXPECTED COMPLETION · DECEMBER 2026

Pearson BTEC HND in Computing (Software Engineering)

ESOFT Metro Campus, Negombo

COMPLETED · DECEMBER 2025

Level 3 Diploma in Information Technology

ESOFT Metro Campus, Negombo

Awarded by Skills and Education Group Awards / UK Awards

2023 - 2024

RECOGNITION

Best Performer of the Diploma Batch

ESOFT Metro Campus

CREDENTIALS & ACTIVITIES

Digital Skills: Digital Marketing

Accenture via FutureLearn · 2023

Introduction to Cloud 101 · AWS Educate training badge

7-Day Maker Better Decisions Challenge · Clearer Thinking

Organised a Hacking Awareness Workshop for junior students and participated in peer mentoring.

Cambridge English Flyers (CEFR A2)

Key Language Centre · 2018

LANGUAGES

Sinhala · Native

English · Fluent

G.C.E. ORDINARY LEVEL

Loyola College, Negombo

4 Distinctions · 3 Very Good Passes · 1 Credit Pass · 1 Ordinary Pass

SCAN MY GITHUB

SELECTED PROJECT PORTFOLIO

EduMind AI

FINAL-YEAR RESEARCH · DEPLOYED

Deployed an AI learning assistant with study planning, progress tracking and personalised feedback. Evaluated student motivation and growth mindset using 87 matched pre- and post-test responses.

STACK Python / Flask / MySQL / Groq API

Smart Route Management & Scheduling | GITHUB

COLLABORATIVE WEB APPLICATION

Team coursework building transport-depot workflows for routes, vehicles, schedules and trip statuses, using MVC design and relational data.

STACK C# / ASP.NET Core / .NET 8 / SQL Server

Student AI Pro | GITHUB

COLLABORATIVE STUDENT ASSISTANT

Contributed backend authentication, persistent conversation storage and Groq API integration for a student-focused chatbot.

STACK Python / Streamlit / SQLite / Groq API

Doctor Channelling System | GITHUB

APPOINTMENT MANAGEMENT · CONSOLE

Patient and doctor records with booking, cancellation and rescheduling; applies queues, sorting and shortest-path algorithms.

STACK Java / Data structures & algorithms

Dream Book Shop | GITHUB

DATA ANALYTICS PROJECT

Cleaned book catalogue data and produced visual summaries of authors, languages, publishers and publication years.

STACK Python / Pandas / Matplotlib

Velvet Vogue | GITHUB

E-COMMERCE COURSEWORK

Built clothing-store pages for product browsing, product details, shopping cart and administration, supported by a MySQL database.

STACK PHP / HTML/CSS / JavaScript / MySQL

OTHER ACADEMIC WORK

Fresh Grocers online-ordering prototype · Leave Management desktop app · Relational database design and UML coursework.
